## Descripción del proyecto:

The lunar camp we have created for astronauts that consists of security entrances, a greenhouse, hangar, common area that consists of capsule beds, bathrooms, gym and a rest area. In addition; there is a laboratory and a chicken farm, a satellite dish with its control room. All the different areas are connected by tunnels, which can be transited by the buggies that can be found in the hangar. The camp has been specially designed in order to provide astronauts the most pleasant stance in the moon.
